Profile

I'm a mathematician by education and self-taught software developer for passion, with over 10 years of experience building full-stack web applications with Python, JavaScript, Node.js and PHP. My expertise also includes system administration (Unix-based and Windows), databases management and data extraction/analysis.

Following a significant rebase in Bologna in 2022, I am currently in search of a job position that aligns more closely with my expertise and skills.

Professional Experience

Developer, *Ser-Vis*   2022 – present
Developer | VB, C# web apps   Bologna, Italy
